

PSM AREA - POLICY

TOOL NAME	Scale up of HIV-Related Prevention, Diagnosis, Care and Treatment for Infants and Children: A Programming Framework (UNICEF/WHO)
SUB-CATEGORIES	HIV/AIDS
COMMODITIES	Laboratory, Medicines, Supplements
LATEST UPDATE	2008
VERSION	None
DEVELOPED BY	UNICEF
WHEN TO USE	When developing national strategic plans for scaling up paediatric HIV diagnosis, care, support and treatment for children who are exposed to or who have HIV in resource-constrained settings with a high HIV burden. The actions required at the national level to establish procurement and supply systems that can support national programme scale up efforts are outlined in the document.
LANGUAGE(S)	English, French, Spanish
LEVEL OF USE	Central
FORM	PDF document, 1MB
AMOUNT OF TRAINING / TA REQUIRED	None
INPUTS & OUTPUTS	None
COST	Free
ADVANTAGES	The publication sets out a comprehensive framework to scaling paediatric HIV diagnosis, care, support and treatment. Contents include background information to put the issue of paediatric HIV care and treatment into context, a description of the full package of interventions for HIV-exposed and infected infants and children, seven recommended strategies for ensuring their delivery, and links to key resources.
LIMITATIONS	None
