

CATÉGORIE - POLITIQUE

NOM DE L'OUTIL	Co-trimoxazole Prophylaxis for HIV-Exposed and HIV-Infected Infants and Children: Practical approaches to implementation and scale up (UNICEF/WHO)
SOUS-CATÉGORIES	VIH/SIDA
TYPES DE PRODUIT	Médicaments
DATE DE MISE à JOUR	2009
VERSION	None
DÉVELOPPÉ PAR	UNICEF
QUAND L'UTILISER	When developing national strategic plans for scaling up co-trimoxazole prophylaxis for children who are exposed to or who have HIV in resource-constrained settings. The actions required at the national level to establish procurement and supply systems that can support national programme scale up efforts are outlined in the document. The principal audiences for this document include national, provincial and district-level programme managers, planners, trainers and implementing partners.
LANGUAGE(S)	Anglais
NIVEAU D'UTILISATION	Central
FORME	PDF document, 2.3 MB
DEGRÉ DE FORMATION OU D'ASSISTANCE TECHNIQUE REQUIS	None
INPUTS & OUTPUTS	None
COÛT	Free
AVANTAGES	This guide was developed to assist national programme managers and implementing partners to effectively implement and rapidly scale up the uptake of co-trimoxazole prophylaxis within the context of existing HIV and MNCH programmes. Contents include a brief review of the evidence supporting the use of co-trimoxazole prophylaxis in children; a summary of common barriers to implementation; strategies and tools to facilitate scale up; and a rapid assessment tool for scaling up co-trimoxazole prophylaxis.
CONTRAINTE	None
